TASK # 1

2.cpp

```cpp
#include <iostream>
using namespace std;

int main() {
    int arr[5] = {5, 3, 8, 1, 2};
    int n = 5;

    // Step 1: Display original array
    cout << "Before Sorting: ";
    for(int i = 0; i < n; i++) {
        cout << arr[i] << " ";
    }
    cout << endl;

    // Step 2: Find Maximum and Minimum
    int max = arr[0];
    int min = arr[0];

    for(int i = 1; i < n; i++) {
        if(arr[i] > max)
            max = arr[i];
        if(arr[i] < min)
            min = arr[i];
    }

    // Step 3: Bubble Sort
```

C:\Users\Ismail Rahim\Desktop\2.exe

```
Before Sorting: 5 3 8 1 2
After Sorting: 1 2 3 5 8
Maximum: 8
Minimum: 1
